Not a fire hazard. Use water spray to keep fire-exposed containers cool. Extinguish fire with agent suitable for surrounding fire.

#### 5.2 Extinguishing media to avoid
None

#### 5.3 Special exposure hazards in a fire
Phosphoric acid can react with metals to liberate hydrogen, a flammable gas. Combustion by-products include oxides of phosphorus.

#### 5.4 Special protective equipment for fire-fighters
A self-contained breathing apparatus.

### 6.0 Accidental Release Measures

#### 6.1 Personal precautions.
Wear chemical splash goggles and gloves.

#### 6.2 Environmental precautions
Avoid releasing large quantities into the environment as phosphoric acid may affect pH of water or soil.
6.3 Method for clean up  For small quantities (as in this product): Wear safety glasses, lab coat and gloves. Absorb or wipe up spill with dry paper towels. Place all material in covered chemical waste container for disposal. Flush spill area with water.

7.0 Handling and Storage

7.1 Handling  For use by dental professionals only. Wear safety glasses and gloves; wash hands after use. Avoid unnecessary exposure. Follow good hygiene practices. Protect soft tissue from etchant during intraoral procedures.

7.2 Storage  Remove applicator tip after use. Keep tightly capped in original container. Store at cool room temperature. Avoid extremes of temperature (>27°C/80°F, <5°C/40°F), alkalis, sulfites, sulfides and most metals.
