11. TOXICOLOGICAL INFORMATION

11.1 Information on Toxicological Effects:

**Potential Health Effects:**
- **Eyes:** Liquid can cause slight irritation with tears and blurred vision. May cause numbness of sensation.
- **Skin:** May cause slight skin irritation and numbness.
- **Ingestion:** May cause slight gastrointestinal irritation.
- **Inhalation:** May cause slight respiratory tract irritation with coughing and anesthetic effects.

**Chronic Health Effects:** Prilocaine hydrochloride is metabolized into ortho-toluidine which is associated with chronic health effects.
- **Irritation:** May cause slight eye and skin irritation.

**Corrosivity:** No data available.

**Sensitisation:** Product is not expected to cause sensitization.

**Carcinogenicity:** Prilocaine Hydrochloride: Chronic oral toxicity studies of ortho-toluidine, a metabolite of prilocaine, in mice and rats shows that ortho-toluidine is an animal carcinogen. The lowest dose at which effects are seen is approximately 50 times higher than the maximum dose of prilocaine hydrochloride to which a human would be exposed during normal use. Ortho-toluidine is classified by IARC as Category 1 (Carcinogenic to Humans) and by NTP as Reasonably Anticipated to be a Human Carcinogen. None of the components are listed as carcinogens by OSHA, IARC, NTP, ACGIH or the EU CLP.

**Mutagenicity:** Prilocaine Hydrochloride: Ortho-toluidine has been associated with mutagenicity in *Escherichia coli* DNA repair and phase-induction assays and *Salmonella typhimurium* with metabolic activation. Other tests in *Salmonella typhimurium* with or without metabolic activation and single strand breaks in DNA of V79 hamster cells were negative.

**Medical Conditions Aggravated by Exposure:** None known.

**Acute Toxicity Data:**
Prilocaine hydrochloride: Skin mouse LD50 550 mg/kg

**Reproductive Toxicity Data:** Studies in rats up to 30 times the normal human dose has shown evidence of impaired fertility and harm to the fetus. There is no clear indication of effects in humans.

**Specific Target Organ Toxicity (STOT):**
- **Single Exposure:** None known.
- **Repeated Exposure:** Repeat or chronic exposure may cause hypersensitivity and the development of methemoglobinemia.

12. ECOLOGICAL INFORMATION

12.1 Toxicity:
No data available.

12.2 Persistence and Degradability: No data available.
12.3 Bio-accumulative Potential: No data available.

12.4 Mobility in Soil: No data available.
